

# Lulu goes to hospital

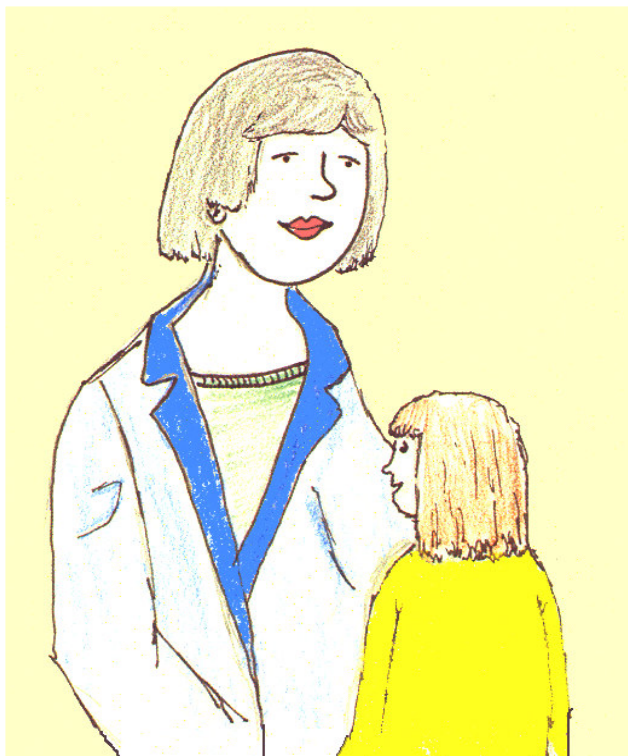

I was feeling really hot and sick one day when I woke up.

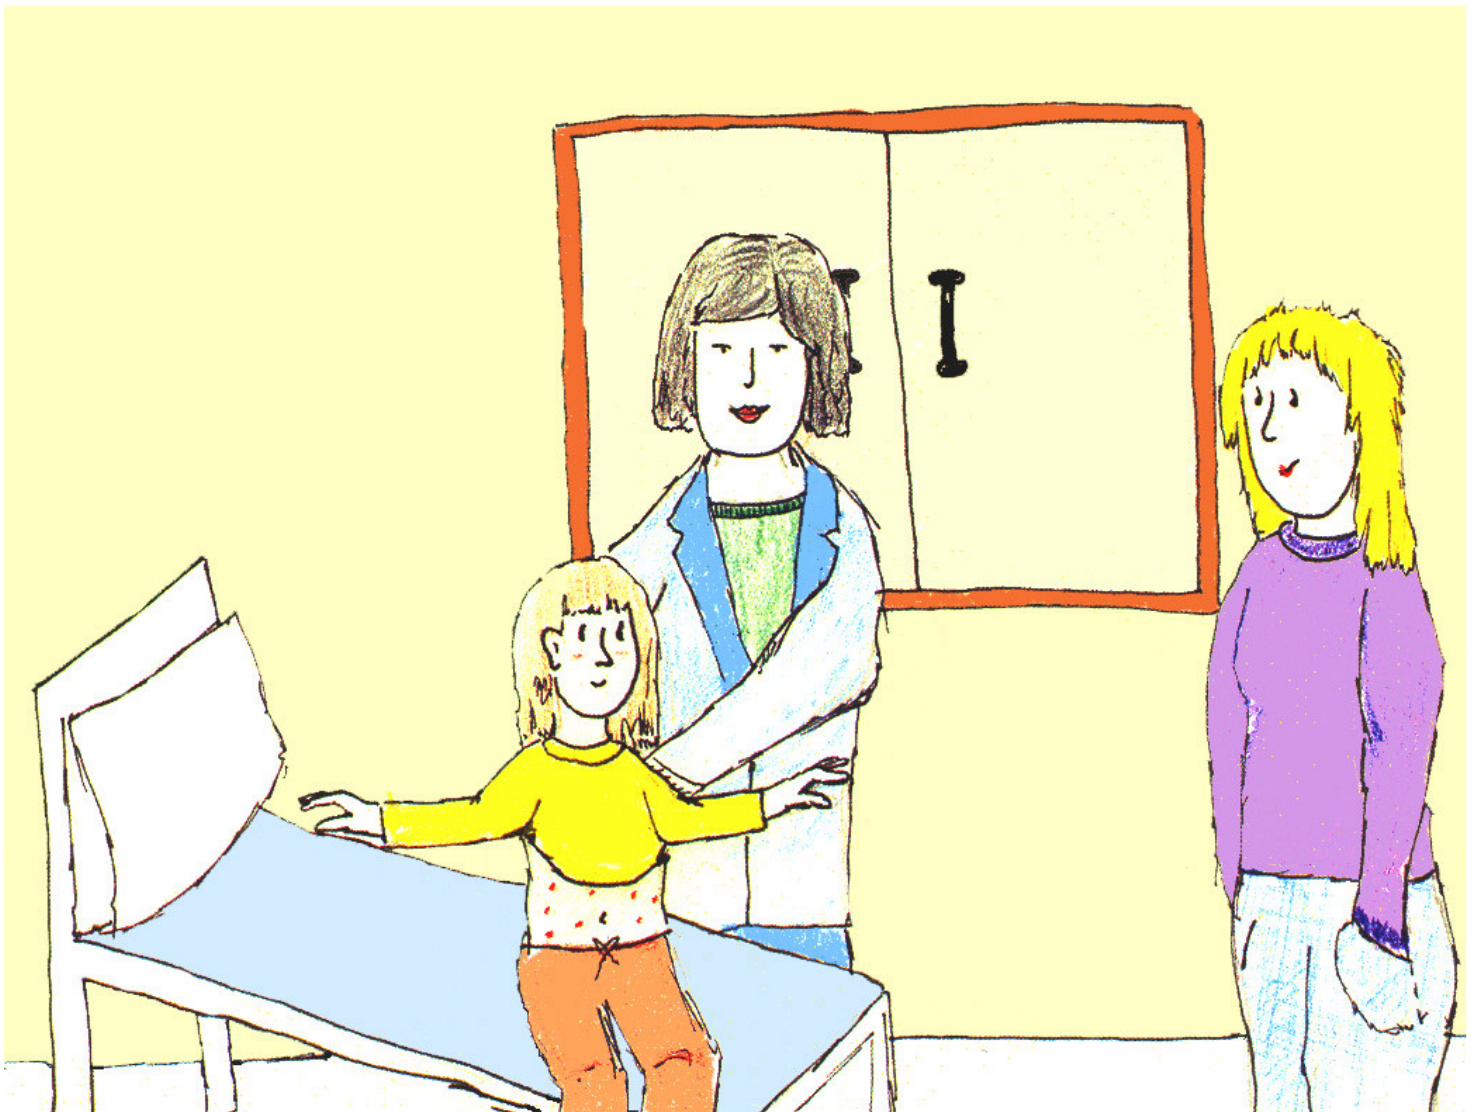

Mummy and Daddy said I would have to go to the hospital.

At the hospital the doctor and nurse said I would have a special test to find out why I was sick

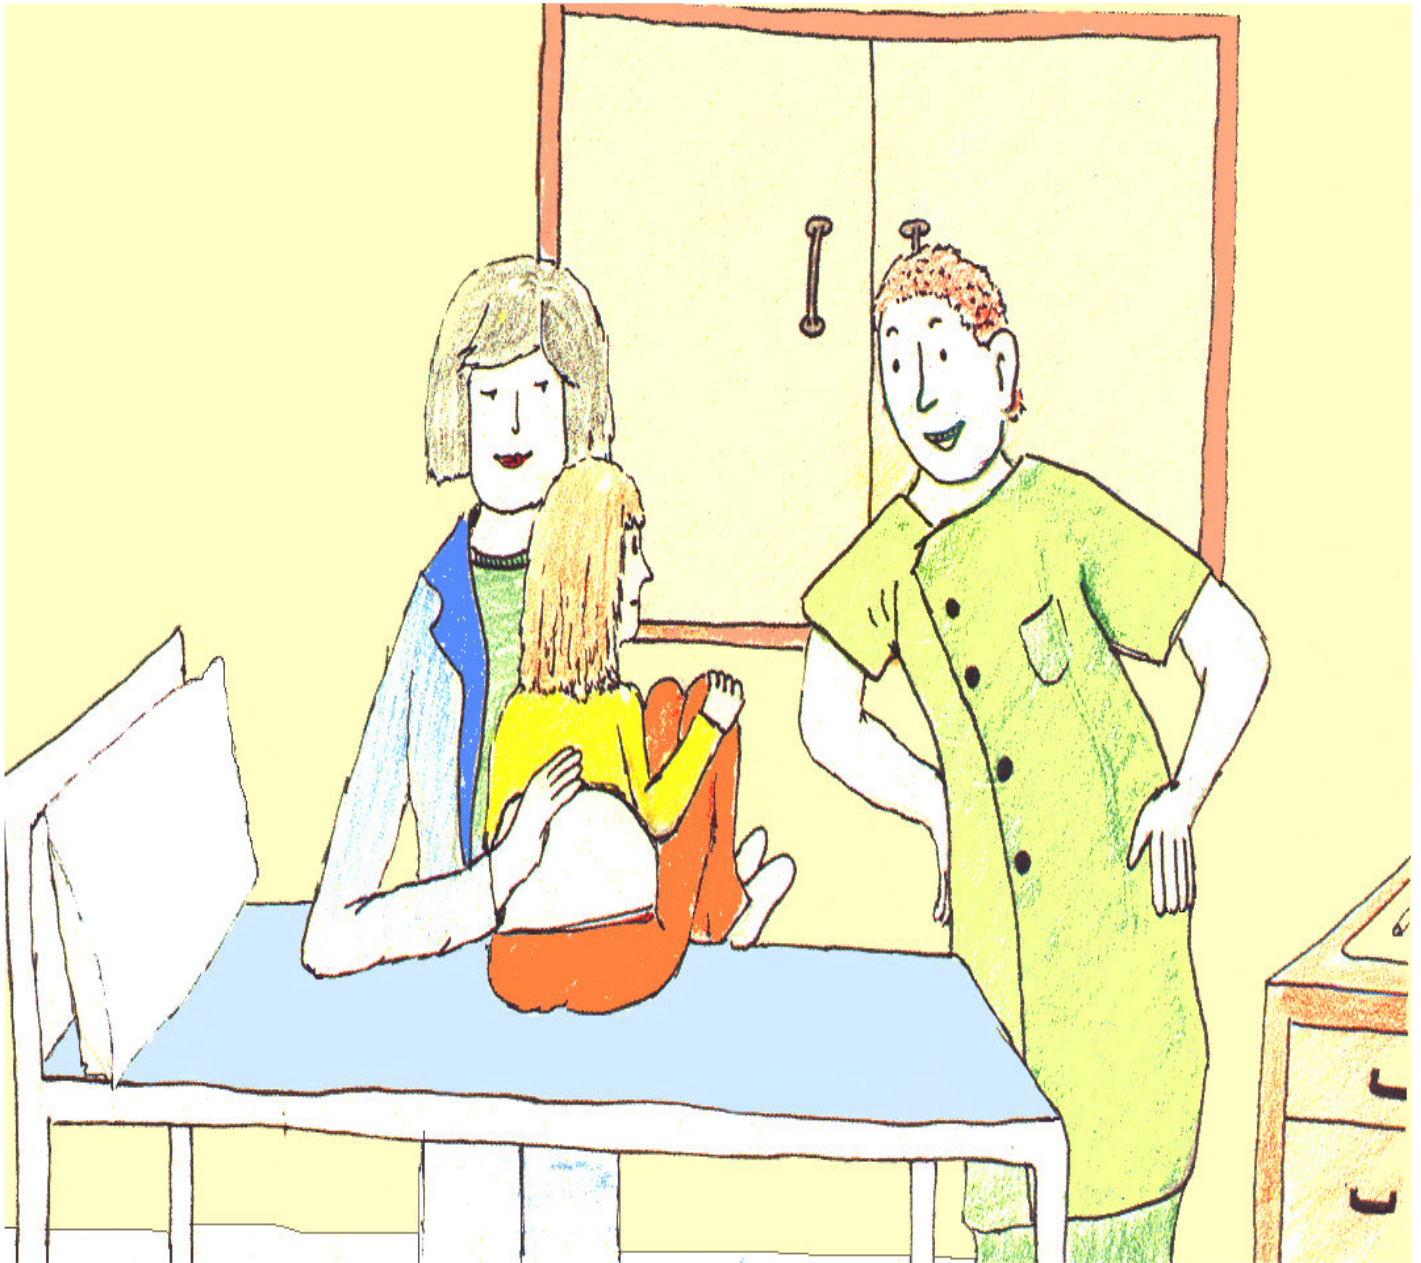

The nurse put magic white cream on my back and then a plaster. It felt cold.

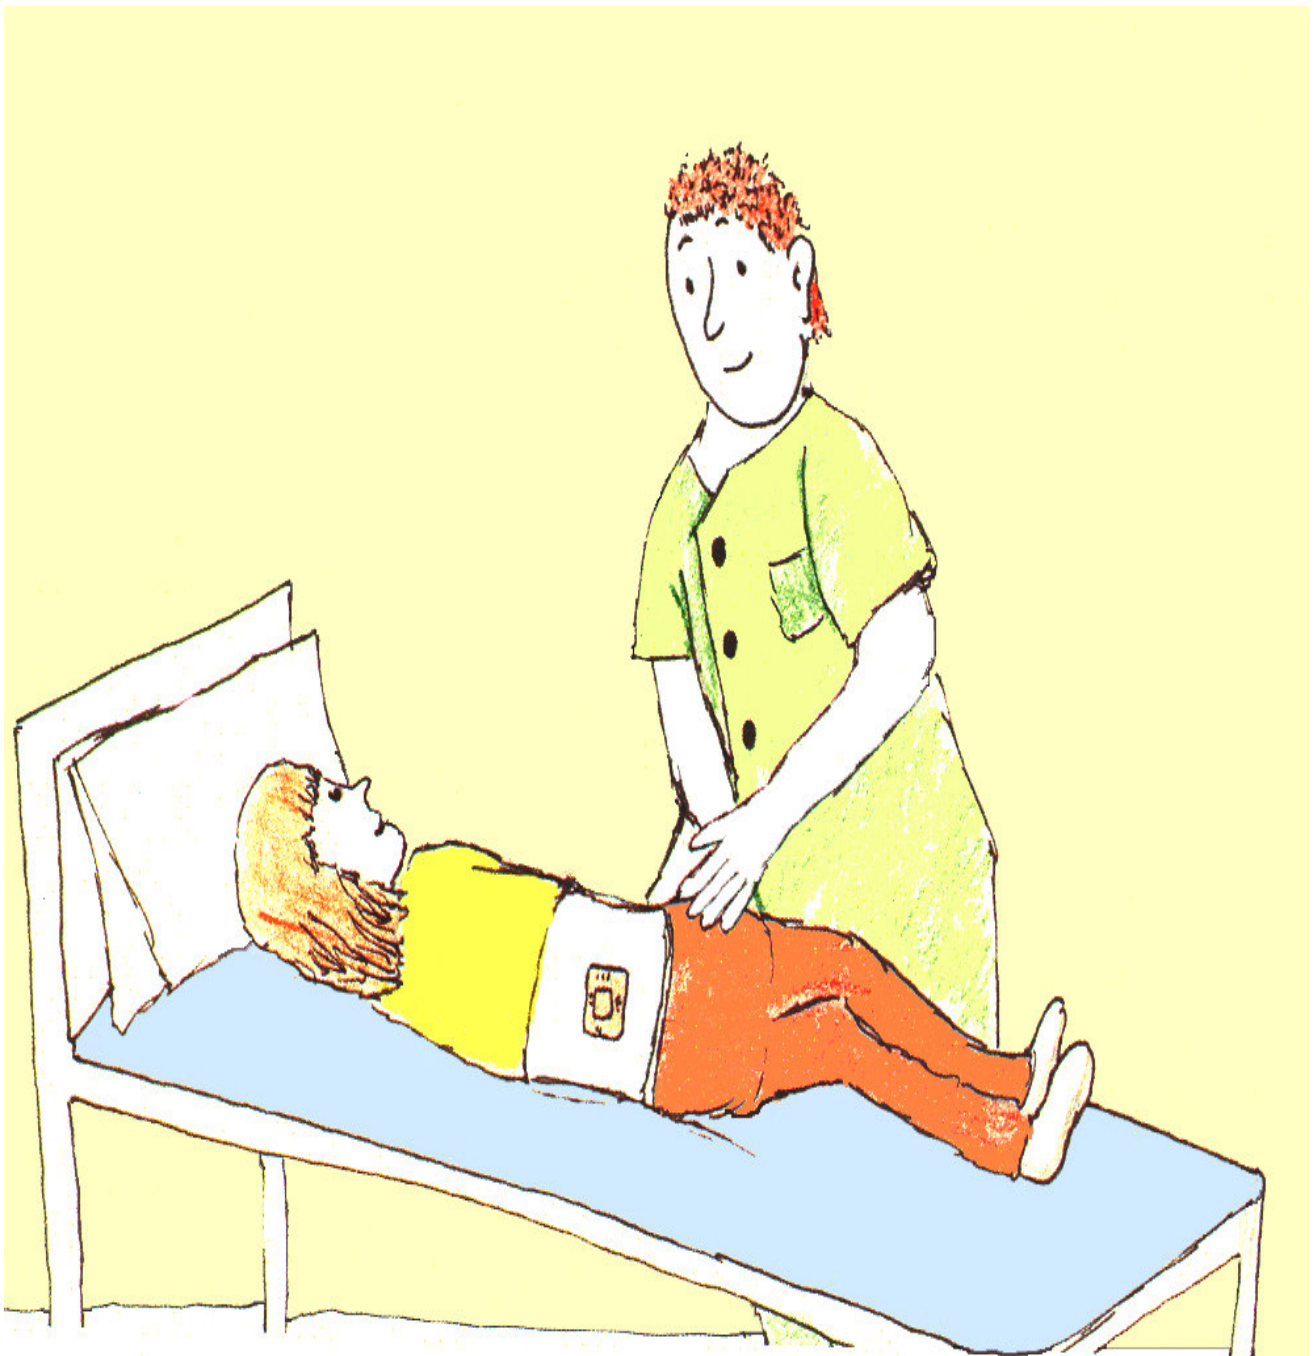

The doctor and nurse said I would have to give my legs a big hug and stay really still in a ball and sing my favorite song.

I hugged my knees really tight. The nurse helped me because I felt tired.

The nurse said I might feel a little ouch on my back and not to be afraid, just keep singing my song.

The doctor rubbed off my magic cream. I felt a little ouch, but I kept on singing. The nurse even sang with me!

I held really still and soon he was finished. He put a plaster on my back. The nurse gave me a sticker and said I was very good.

Mammy and Daddy said that I was a very brave girl.

They gave me a big hug and a kiss

The End
